Abstract (en)

[origin: EP3885509A1] The invention relates to a luminiscent skirt for sun protection elements that acts as a decorative element or an indicating and identifying element and consists of a flexible piece (1) that fits to the shape and dimensions of the sun protection element (2) in which it is installed, secured along the length thereof, and a second opaque layer (3) that is solidly and mechanically adhered to the piece, both elements (1, 3) including geometric forms (4) on one or both faces, that are cut with a laser or mechanical blade, to Project a beam of light therethrough by means of a light panel (6) situated between said elements (1, 3). The piece (1) also includes a third layer (5) of translucent material, which is adhered as a support of the cut shapes (4), and also a filling material (8) cut in the shape of rectangles.
