Abstract (en)  
A diffuser (1) for mounting on the ceiling (2) comprising a structure (3) which defines at least one first return duct (5A), for air (A1) taken from a controlled environment, and a treatment compartment (7) communicating, through at least one absolute filter (8), with the controlled environment, the said structure (3) comprising at least a first blower (6A) which draws air from the first return duct (5A) and conveys it, through the treatment compartment (7) and the absolute filter (8), into the controlled environment; the structure (3) comprises a frame (10) and a counterframe (11), the frame (10) being supported by actuators (12) configured to move the frame (10) from a first position, in which the frame (10) is away from the counterframe (11) for a procedure to replace the at least one absolute filter (8), to a second position, in which the frame (10) is near the counterframe (11), the frame (10) comprising at least one seat (S) housing the said at least one absolute filter (8).
