Abstract (en)

[origin: CN113448241A] A setting machine (1000) for making a setting and/or adjustment on an assembly (1) attached to a receptacle (10), including a positioning module (100) to move this receptacle (10) on command from control means (3000) to convey it into a setting and/or adjustment position below an acquisition module (200), which includes measuring and/or testing means for determining the spatial position of the receptacle (10), and including a setting and/or adjustment module (400) for making a setting and/or an adjustment with motorised axes for moving, opening and closing, in a clamp plane perpendicular to a clamp rotation direction (DF, DG), a clamp (600) arranged to drive or deform a mobile component or a component included in such an assembly (1) borne by a receptacle (10), and method for using such a setting machine for setting and/or adjusting at least one horological component.

Abstract (fr)

Machine réglante (1000) d'horlogerie pour réglage et/ou ajustement sur un ensemble (1) fixé sur un réceptacle (10), comportant un module de positionnement (100) pour mouvoir ce réceptacle (10) sur commande de moyens de pilotage (3000) pour l'amener dans une position de réglage et/ou d'ajustement sous un module d'acquisition (200), lequel comporte des moyens de mesure et/ou de contrôle pour déterminer la position dans l'espace du réceptacle (10), et comportant un module de réglage et/ou ajustement (400) pour effectuer un réglage et/ou un ajustement sur cet ensemble (1), et procédé d'utilisation d'une telle machine réglante pour le réglage et/ou l'ajustement d'au moins un composant horloger.
