Abstract (en)

[origin: WO2020107051A1] The invention relates to a tongue (1) for a sports shoe, in particular an inner shoe (4) of a ski boot, comprising an upper portion (5) and a foot portion (6), a front part (7) that has a front surface (8) for coming into contact with the sports shoe and a rear surface (9), and a rear part (10) that has a rear surface (11) for coming into contact with the leg of a user and a front surface (12). Along a circumference (13), a connection between the rear surface (9) of the front part (7) and the front surface (12) of the rear part (10) is provided, at least in portions, wherein the connection between the rear surface (9) of the front part (7) and the front surface (12) of the rear part (10) is releasable along a lifting section (14) by means of reclosable connection elements (20), wherein the lifting section (14) is arranged at least in the foot portion (6).
