Abstract (en)
[origin: WO2020112628A1] An airtight cosmetic compact, wherein the airtight feature is created by interaction between a seal on the inside of the cover and the upwardly facing recess of the base. In some embodiments the compact comprises a base, and a ring secured to a cover to form a cover assembly. In other embodiments the ring and cover are not secured to one another. In some embodiments a recess is provided in the base where cosmetics are placed. In some embodiments an elevator is provided within said recess for raising and lowering the cosmetics within the recess.
