Abstract (en)
[origin: WO2020109697A1] The invention relates to a plastic container (1) comprising a panel (14) having at least a radius of curvature greater than 100 mm, the panel (14) having reinforcing means (16), characterised in that the reinforcing means (16) include: - a peripheral groove (160) defining a reinforcing contour; - a plurality of internal grooves (161; 162) extending inside the reinforcing contour, each internal groove (161; 162) having two ends (161a; 161b; 162a; 162b) which each lead into the peripheral groove (160), or at least one end (162a; 162b) which leads into another internal groove (161).
