Abstract (en)
[origin: WO2020108674A1] The invention relates to a shifting device of a motor vehicle change-speed gearbox, comprising a shifting shaft (1) for selecting and engaging gear speeds and a selection contour (7) arranged on the shifting shaft (1) and having a first ramp profile (8) in the selection direction of the shifting shaft (1) for pretensioning a selection locking means (9), the selection contour (7), viewed in the shifting direction, having a second ramp profile (12), which has a latching position (16), on the end face in the shifting direction, for a mounting securing means of the shifting shaft (1). The invention also relates to a mounting method for a shifting device of this kind.
