Abstract (en)
[origin: WO2020109331A1] The invention relates to a food preparation system (10a) which has at least one output unit (12a) and at least one control unit (14) which is designed for guiding through at least one recipe by means of the output unit (12). In order to provide a generic system with improved properties with respect to operational comfort, the control unit (14a) takes into account, when guiding through the recipe, at least an amount of information relating to at least one personal parameter (18a).
