Abstract (en)
[origin: WO2020109732A1] The invention relates to an ignition charge consisting of a cellulose ester-based support film having, on one of its faces, an ignition charge distributed discontinuously in solid geometric volumetric patterns across multiple areas of the film, said ignition charge comprising at least an ignition powder and a cellulose ester. The invention also relates to a method for obtaining said ignition charge and to the use thereof in an igniter tube for ammunition.
