Abstract (en)
[origin: EP3889054A1] A packaging process in a packaging machine of groups of cans to form a package (35) by applying a blank (14) made of cardboard or the like, wherein each blank (14) is flat, shear-printed or with the use of dies to generate at least two openings (15) arranged consecutively for a group (13) of cans (11) comprising at least two cans (11) aligned consecutively, wherein each blank (14) is fed continuously from a deposit (16) and said cans (11) are continuously moved forwards, the process comprising the following steps:- feeding said blanks (14) consecutively according to at least two independent paths (A,B);- feeding said groups (13) of cans (11) in a single further path (C), wherein each group (13) of cans (11) comprises at least two cans (11) aligned consecutively;- withdrawing at least one pair of consecutive blanks (14) from each of said at least two paths (A,B) by means of at least one manipulator (21,22);- depositing said at least one pair of blanks (14) withdrawn from each of said at least two paths (A,B) on groups (13) of cans (11) by means of said at least one manipulator (21,22);- inserting each blank (14) deposited on a respective group of cans by means of pressing elements (33) which are caused to press said openings (15) of said blank (14) on upper edges of said cans (11) of said group (13).
