Abstract (en)
The present utility model relates to a hanging umbrella display rack comprising a base, wherein at least two connecting plates can be arranged on the base in a fixed or slidable manner and connecting portions and display boards are arranged at the two ends of the connecting plates. A plurality of detachable connecting plates are arranged on the base of the hanging umbrella display rack, and one base can match multiple specifications of hanging umbrellas. Placing a plurality of hanging umbrellas on one base lowers the requirement for the weight of the base. Adding a display card to the base may be effective for promoting the product.
