Abstract (en)
The impeller assembly associable with a centrifugal pump comprises a first disk (10) and a second disk (20) firmly assembled with each other. The first disk (10) is provided with a central hole (11) and a plurality of ribs (13) obtained by pressing on a face of the same first disk facing the second disk (20). The second disk (20) is provided with a central hole (21) and a rim (22) protruding from said central hole (21). Said ribs (13) are configured such that they shape a plurality of channels (14) separated by the same ribs between the first disk (10) and the second disk (20).
