Abstract (en)

The disclosure relates to a fixture support for installation of a built-in light source emitting or illuminating visible light, such as a spotlight, arranged to be fitted in a hole in a building structure such as a ceiling, a wall, or similar, wherein the fixture support comprises: at least one terminal, a housing, a sealing arrangement enclosing the outer surface of the housing, and one or more displacement means. The disclosure further relates to a method for installation of a fixture support for installing a light source in a building structure and a use of the fixture support.
