Abstract (en)

[origin: EP3889929A1] An object of the present disclosure is to make a specific location, where an event calling for disaster prevention measures is present, much more easily determinable. A detector (1) detects the presence of any event that calls for disaster prevention measures. The detector (1) includes a holding unit (H1) to hold at least location information about an installation location (L1) where the detector (1) is installed.
