Abstract (en)

[origin: WO2020115658A1] Disclosed is a device for displaying and packaging hairdressing instruments, comprising a plurality of blow-dry rollers (2), at least one removable gripping handle (3) to which one of the blow-dry rollers (2) can be attached, and a storage housing (1). The storage housing (1) comprises a receiving compartment (4) dimensioned to receive and contain the plurality of blow-dry rollers (2), a peripheral wall (5) of the receiving compartment, a bottom wall (6) of the receiving compartment, and a retractable top cover (7). Stabilising means are shaped to each hold one of the blow-dry rollers (2) oriented along a respective substantially vertical axis and separated from the other rollers. An intermediate space (10) contains an ultraviolet radiation source (11) for directing and distributing ultraviolet radiation into the receiving compartment (4). Magnets (20) are distributed on the inner face of the cover (7) for retaining metal tools. An electrical safety switch (11e) actuated by the cover (7) inhibits the supply of power to the ultraviolet radiation source (11) when the cover (7) is not in the closed position.
