Abstract (en)  
[origin: WO2020114857A1] The invention relates to a printing press and to a method for producing security paper products or security paper intermediate products with a feed device (01) for feeding unprinted printing material (02) into the printing press, with a plurality of printing units (06; 07; 08; 09), by way of which the unprinted printing material (02) can be printed at one or at a plurality of printing points (11; 12) in an indirect planographic and/or letterpress printing method, wherein at least one inspection device (41) which is configured as a transmission inspection device (41) for the inspection of the printing material (02) which is still unprinted is provided in a conveying path (36) between the feed device (01) and the first printing point (11; 12) which is arranged in the printing material path.
