Abstract (en)

[origin: WO2020114664A1] This human-machine interface (16) for a motor vehicle dashboard (6) comprises a support (24) and a screen (18), the support (24) comprising an oblong rail (26), the screen (18) being mounted on the rail (26) and capable of moving between a first position and a second position, the first position being located, when the interface (16) is mounted on a dashboard, opposite a driver-side area of the dashboard, the second position being located, when the interface (16) is mounted on a dashboard, opposite a central area of the dashboard. The rail (26) comprises at least one curvilinear portion (34, 36), the screen (18) being flexible.
