Abstract (en)

[origin: WO2020114785A1] The invention relates to a method for assisting a user in controlling a motor vehicle (2) remotely by means of a remote control device (3), wherein a first environmental image (13) of at least a part (20) of the environment (9) of the motor vehicle (2) is provided from a specific perspective (19) according to sensor data (14) provided by means of at least one environmental sensor (5, 6, 7, 8) of the motor vehicle (2) and is displayed by means of the remote control device (3). The specific perspective (19) is selected from a plurality of selectable perspectives (19) as a perspective (19) independent of a position of the at least one environmental sensor (5, 6, 7, 8) according to a user input detected by means of the remote control device (13) and made by the user.
