Abstract (en)

[origin: WO2020114846A1] The present invention relates to a balustrade (1) comprising a plurality of first panels (2), a plurality of second panels (3), and a handrail guide (4) arranged on the first panels (2), the second panels (3) being arranged laterally offset with respect to the first panels (2) in such a way that the second panels (3) protrude beyond the handrail guide (4). Support elements (5) are arranged in each case between two first panels (2), with at least one holding element (10) being arranged on the support elements, which holding element holds the second panels (3). The invention also relates to a people-transporting device having at least one such balustrade (1). Lastly, the invention relates to a method for modernising a people-transporting device, wherein the people-transporting device is fitted with such a balustrade (1).
