Abstract (en)

[origin: WO2020115366A1] An object of the invention is a base structure of the space element to be attached to the building site (102). The base structure (100) comprises a load-bearing and compartmenting modular separate fitting structure (104), which comprises at least one fitting part (106) dimensioned to the selected building site, and the base structure (100) comprises a floor structure (105) of the space element.
