Abstract (en)

[origin: WO2020114675A1] For a locking piece (1) for a locking unit (20), comprising a housing (2) having a housing opening (3), a locking arm (4), which passes through the housing opening (3) and is mounted in the housing opening (3) so as to be displaceable in a direction (5) running at a right angle to the longitudinal direction (8) of the locking arm, and a slide (7), which can be displaced in the housing (2) in the displacement direction (5) of the locking arm (4) and which is motion-coupled to the locking arm (4) in the displacement direction (5), according to the invention the housing (2) and/or the slide (7) are formed from magnetically attractable material, and at least one magnet (10) acts between the housing (3) and the slide (7), which magnet fixes the locking arm (4) in any of the possible displacement positions within the housing opening (3).
