Abstract (en)

[origin: WO2020115364A1] There is provided a cooling unit (200) for cooling a target system (290), the cooling unit (200) comprising a first part (201) comprising a warm side (212) of a thermoelectric cooler (TEC) (210); a second part (202) comprising a cool side (214) of the TEC (210); a first air blowing means (220) arranged to draw air from surroundings (295) of the cooling unit (200) to the first part (201); and supply air from the first part (201) to the surroundings (295); a second air blowing means (230) arranged to draw air from the target system (290) to the second part (202); and supply air from the second part (202) to the target system (290); an insulation frame (240) arranged to separate the first part (201) of the cooling unit (200) and the second part (202) of the cooling unit (200); and guide the air from the cool side (214) of the TEC (210) to the target system (290).
