Abstract (en)

[origin: WO2020039246A1] This invention refers to digital computing and data processing media specially adapted for creating orders and manufacturing windows and doors. A user request is processed by combining this request with data from update data packages provided by manufacturers in the declared system. The final result of processing a user request is translated into a set of predefined human languages and can be accessed from user terminals of all categories of users involved in the work with this order and from the manufacturer terminals involved in the order processing.
