Abstract (en)
The invention relates to an electrical connector system comprising an electrical connector (102) for receiving a plurality of electrical cables, and a mating second electrical connector (106) for receiving a plurality of electrical cables, wherein the mating second electrical connector (106) is mechanically connectable to the electrical connector (102), and wherein, in the mount state, the mechanical connection is a push pull type connection or a snap fit connection between an electrical connector attachment means (114) and a mating second connector attachment means (124) of the mating electrical receptacle connector (106).
