Abstract (en)

[origin: WO2020120182A1] The invention relates to a method for producing a multiphase washing or cleaning agent shaped body, comprising the steps of: a) providing a first free-flowing washing or cleaning agent; b) providing a second washing or cleaning agent; c) feeding the first and second washing or cleaning agent to an injector; d) introducing the first free-flowing washing or cleaning agent and the second free-flowing washing or cleaning agent, which is different from the first, into a mould by means of the injector; e) consolidating at least one of the free-flowing first and second washing or cleaning agents in the mould, thus forming a multiphase washing or cleaning agent shaped body; f) removing the multiphase washing or cleaning agent shaped body from the mould, the first and second free-flowing washing or cleaning agent being introduced into the mould through outlet openings of the injector which are separated from one another. The invention also relates to multiphase shaped bodies produced by means of this method.
