Abstract (en)

[origin: WO2020120024A1] The present invention relates to a washer/dryer (1) comprising a body; a tub (2) which is disposed into the body; a drum which is disposed in the tub (2), which rotates around its own axis and wherein the laundry is loaded; at least one balance weight (3) which is mounted onto the tub (2) and which remains between the tub (2) and the body; a connection member (4) which enables the balance weight (3) to be fixed to the tub (2); a connection hole (5) which is arranged on the balance weight (3) and through which the connection member (4) passes; a fixing housing (16) which surrounds the connection hole (5) at the surface of the balance weight (3) facing the tub (2); and a bearing (6) which is positioned on the tub (2), which extends from the outer surface of the tub (2) towards the balance weight (3) and wherein the connection member (4), passing through the connection hole (5) on the balance weight (3) and extending towards the tub (2), is seated. The tub (2) further comprises a step (7) which surrounds the bearing (6) and a connection extension (9) which surrounds the step (7) such that the bearing (6) is at the center; the balance weight (3) further comprises a connection housing (11) which is arranged on the surface of the balance weight (3) facing the tub (2) and wherein the connection extension (9) is seated.
