Abstract (en)

[origin: WO2020120398A1] The invention concerns a handle (1) of a door (30), in particular a motor vehicle door, characterised in that it comprises:
- a body (2) intended to be mounted so as to be movable for the disengagement of at least one lock of the door by displacement, in particular by displacement by pulling the body (2) relative to a door; and - a tumbler (5) mounted so as to be movable relative to the body (2) between an idle position and an activation position, so as to be able to reach the activation position by pressing on the tumbler (5) to disengage the lock of the door. The invention also concerns a door comprising such a handle and a vehicle comprising such a door.
