Abstract (en)

[origin: WO2020123608A1] In an embodiment, a method includes receiving, from a computing device, (i) a user identifier, (ii) a vehicle identifier for a vehicle, and (iii) contextual information related to vehicle service content currently displayed on the computing device. Based on the contextual information, the method includes determining a vehicle scan tool function to perform on the vehicle. The method further includes identifying a vehicle scan tool associated with the user identifier. The method also includes causing a selectable vehicle scan tool initialization option to be displayed on the computing device. The method further includes receiving, from the computing device, a selection of the selectable vehicle scan tool initialization option. In response to receiving the selection, the method additionally providing instructions to initialize the vehicle scan tool to perform the vehicle scan tool function on the vehicle.
