Abstract (en)

[origin: WO2020119845A1] The invention proposes an installation element for electrical connections having a base housing (01), a housing top part (10) having through openings (11), at least one socket unit (02) and an operating device (45, 60, 101), the housing top part (10) being fixed to the base housing (01) and a rotatable apparatus (30) being arranged within the base housing (01) in such a way that by operation of the operating device (45, 60, 101), the rotatable apparatus (30) can be positioned in an open position or a closed position for the through openings (11) for releasing electrical connections.
