Abstract (en)
[origin: WO2020130843A1] Composition in the form of an aqueous solution comprising a photosensitizer for use in a method of photodynamic therapy for an external crustacean parasite infection in salmonid fish, said external crustacean parasite infection comprises an infection of salmon lice, *Lepeophtheirus salmonis*, *Caligus rogercresseyi* and *Caligus* spp. Said photosensitizer is curcumin or a pharmaceutical acceptable derivative thereof, and said photosensitizer is administered in a bath treatment of the salmonid fish in need of such treatment, and the salmon lice is illuminated by light.
