Abstract (en)

[origin: WO2020128827A1] A machine for making tubular segments of the tobacco industry, comprising feed means (10, 20) for feeding a first and a second continuous web (2, 3), a forming station (30) which folds and/or deforms the first continuous web (2) in such a way as to give the first web (2) a shaped configuration, a wrapping station (50) where the second web (3) is wrapped around the first web (2) with the shaped configuration to obtain a continuous tube (100) defined by a tubular cover containing the first web (2) with the shaped configuration, and a cutting station (70) for dividing the continuous tube into a succession of tubular segments (100).
