Abstract (en)
[origin: WO2020127851A1] The invention relates to a steam hair-styling appliance (1) for shaping the hair, comprising: - a first jaw (2) and a second jaw (3), arranged opposite one another and hinged together, a first treatment surface (4) being supported by the first jaw (2) and a second treatment surface being supported by the second jaw (3), the first and second treatment surfaces being configured to grip at least one lock of hair, and - a liquid reservoir, said first and/or second jaw (2, 3) additionally comprising: - a system for vapourising (7) the liquid to form steam, comprising at least one vaporisation chamber (71) which has an inner surface and is in communication via an injection tube (74) with the liquid reservoir, said injection tube (74) having a free end which forms a point for injecting the liquid into the vaporisation chamber (71), and - a system for dispensing (7') the steam from the vaporisation system (7), comprising at least one steam dispensing port (75) directed toward the at least one lock of hair, characterised in that the vaporisation chamber (71) has an inner surface that is at least partly covered by a hydrophobic layer (9), positioned beneath the injection point.
