Abstract (en)

[origin: WO2020127905A1] The present invention relates to an apparatus for manufacturing (2) a cosmetic product, comprising a mixing machine (6) which comprises a removable receiving device (5), the mixing machine (6) comprising - a support (31) defining a receiving casing (32) which is capable of receiving the receiving device (5), the receiving device (5) being configured to receive first and second capsules (3, 4) containing a first formulation and a second formulation, respectively, the two capsules (3, 4) being fluidly connected, - an actuating system (35) which is movable inside the receiving casing (32) to exert a pressure force on the receiving device (5) and/or on the first and/or the second capsule (3, 4), - a clamping mechanism (54) which is movable relative to the support (31) and configured, \* in an insertion position, not to interfere with the insertion and removal of the receiving device (5) comprising capsules (3, 4) in the receiving casing (32), and, \* in a clamping position, to clamp a portion of a capsule (3.5), wherein the clamping mechanism (54) is a clamping wheel (54.1) which is rotatably movable about a clamping wheel axis (54.2).
