Abstract (en)

[origin: WO2020127910A1] The present invention relates to a receiving device (5) to form a production apparatus (2) when said receiving device (5) is inserted in a mixing machine (6), the receiving device (5) comprising - a first receiving location (13), configured to receive a first capsule (3) containing a first formulation, - a second receiving location (14) configured to receive a second capsule (4) containing a second formulation, - a first pressing element (19) situated at a first actuation face (8.1) of the receiving device (5) and able to move inside the first receiving location (13) so as to apply force to the first capsule (3), and/or - a second pressing element (21) situated at a second actuation face (9.1), preferably opposite the first actuation face (8.1) and able to move inside the second receiving location (14) so as to apply force to the second capsule (4), wherein at least one pressing element (19, 21) is a vane able to move in rotation about a hinge (10), the mobile vane being configured to penetrate one of the, first and second, receiving locations (13, 14).
