Abstract (en)  
[origin: WO2020127914A1] The present invention concerns a reception device (5) for forming a mixing machine (6) when said reception device (5) is inserted in a manufacturing apparatus (2), the reception device (5) comprising - a first reception location (13), configured to receive a first capsule (3) containing a first formulation, - a second reception location (14), configured to receive a second capsule (4) containing a second formulation, the two capsules (3, 4) being able to be fluidically connected, - a first actuating face (8.1), - a second actuating face (9.1), opposite the first actuating face (8.1), - a heating element (46) configured to heat at least one of the first and second capsules (3, 4) when the reception device (5) equipped with the first and second capsules (3, 4) is received in the mixing machine (6), - a first electrical contact track (23.1) for electrically supplying the heating element (46), located on a first connection face (23) of the reception device (5), - a second contact track (24.1) for electrically supplying the heating element (46), situated on the second connection face (24) of the reception device (5).
