Abstract (en)

[origin: WO2020126012A1] Composition based on sodium bicarbonate and on fatty acids Powder comprising at least 93% of sodium bicarbonate and from 0.01% to 7% of an unsaturated C6-C22 carbon fatty acid, or of a branched saturated C6-C2 carbon fatty acid, or of a saturated linear C6-C12 fatty acid, or of an alkali metal or alkaline earth metal salt thereof, and having less than 1% of sodium carbonate or less than 0.02% of ammonia equivalent. Use of unsaturated C6-C2 carbon fatty acid, or of a branched saturated C6-C2 carbon fatty acid, or of their alkali metal or alkaline earth metal salt, for improving the fluidity of alkali metal bicarbonate, alkali metal carbonate or alkali metal sesquicarbonate powders.
