Abstract (en)

[origin: WO2020126296A1] A wiper frame (10), more particularly for a windscreen (20) of a motor vehicle, is proposed. This comprises a support element (12) and a wiper blade (14), wherein the wiper blade (14) has a wiper lip (28) and a support portion (22), for fastening the wiper blade (14) to the support element (12), and further comprises a first tilting web (24), which serves to fasten the wiper lip (28) to the support portion (22). According to the invention, the wiper lip (28) is fastened to the support portion (22) by the first tilting web (24) and by at least one second tilting web (26) that is approximately parallel to the first tilting web (24).
