Abstract (en)

[origin: WO2020126163A1] A labelling apparatus (100) for containers (191), such as bottles, having a cutting device (101) for cutting off labels (131) from a label strip (130), the cutting device comprising a cutting cylinder (111) and a cutting element (112), wherein the label strip can be transported along the cutting cylinder in order for labels to be cut off, characterized in that a suction-extraction means (104, 105, 107) is arranged in the region of the cutting cylinder or downstream of the cutting cylinder, such that said suction-extraction means (104, 105, 107) can extract a label transported along the cutting cylinder, or along a device (102) arranged downstream of the cutting cylinder, by suction from the cutting cylinder or the device.
