Abstract (en)  
[origin: WO2020128326A1] The present invention relates to a composition comprising: - a composition A comprising: - at least one polyurethane P comprising at least two acrylate terminal functions; and - at least one epoxy resin; and - a composition B comprising: - at least one polyamine B1 comprising at least two functions chosen from the primary and secondary amines; - at least one polyamine B2, different from the polyamine B1, comprising at least two functions chosen from the primary and secondary amines; the composition being characterised in that: - it does not comprise polythiol; and - the weight ratio of polyurethane(s) P/epoxy resin(s) in the composition A ranges from 1/49 to 99/1.
