Abstract (en)

[origin: WO2020127499A2] The present invention relates to methods for diagnosing a Parkinson's syndrome (PS), Parkinson's disease (PD), or Parkinsonism in an individual. Further, the present invention relates to a method for differential diagnosing between PD and Parkinsonism. Furthermore, the present invention relates to methods for monitoring the course of a Parkinson's syndrome, Parkinson's disease (PD), or Parkinsonism in an individual. In addition, the present invention relates to kits suitable to carry out the above described methods.
