Abstract (en)

[origin: WO2020124210A1] The invention relates to an anode assembly (1) comprising an anode rod (10), an anode (20) and connecting means connecting the anode rod (10) to the anode (20). The connecting means comprise two sealing bars (30) extending along an upper face (210) of the anode (20), as well as a crossbar (40) connecting the sealing bars (30) to the anode rod (10). The sealing bars (30) comprise a lower portion (31) sealed in the anode (20) as well as an upper portion (32) extending out of the anode (20). The anode assembly (1) comprises two anti-spill rims (51) extending along the sealing bars (30) from the upper portion (32) of the sealing bars (30) to above the junction between the sealing bars (30) and the crossbar (40).
