Abstract (en)

[origin: WO2020126491A1] The present invention relates to a laundry washing and/or drying machine (1) comprising at least one hinge group (12) having at least one hinge body (8) which is fixed onto the body (3), at least one hinge arm (9) which is fixed to the hinge body (8) from one end and which extends outwards from the hinge body (8), at least two shafts (10) which extend in opposite directions from the ends of the hinge arm (9) which are not connected to the hinge body (8), and at least two bearings (11) each connected to the hinge arm (9) from one end so as to house a respective shaft (10) and to rotate around the shaft (10) axis and which are placed into the housing (7) so as to be fixed to the frame (4). The at least two bearings (11) are connected to the hinge arm (9) such that a threshold force of a certain amplitude has to be applied onto at least one thereof so as to rotate around the axis of the shaft (10).
