Abstract (en)

[origin: WO2020126297A1] The invention relates to a device (1) for accommodating a toilet cleaner, comprising at least one securing device (4) for securing the device (1) in a use position in a toilet bowl and a housing (2) which in turn comprises at least one first housing part (6) which forms an accommodating means for the toilet cleaner, has at least one main opening (12) and which is completely closed except for the at least one main opening (12), and at least one second housing part (8) which controls the water supply to the toilet cleaner and is designed as a cover for the at least one main opening (12), wherein the second housing part (8) has a number of flushing openings (20) through which water can be directed to the toilet cleaner and dissolved toilet cleaner can be directed out of the housing (2) in a flushing process.
