Abstract (en)  
[origin: WO2020127397A1] Disclosed is an assembly of a connection lug and a support element of a floor covering element, the support element comprising a base arranged to be positioned on an elevation stud, the base comprising a stop member, the connection lug being arranged to connect the support element to the stud, the base of the support element comprising a set of fastening plates, the connection lug comprising a set of first fastening members, the first fastening members being arranged so as to be able to engage between the fastening plates and come into contact with them in order to allow a translational movement between the support element and the connection lug, the connection lug comprising a set of second fastening members arranged to engage in the stud and allow the connection lug to rotate relative to the elevation stud.
