Abstract (en)
[origin: WO2020125858A1] The subject of the invention is a lock (1) for a motor vehicle, in particular a tailgate lock (1), having a locking mechanism (2) with a rotary latch (3) and at least one pawl (4), with a lock holder (21), wherein the lock holder (21) can be brought into engagement with the locking mechanism (2) in at least one latching position, with a drive element (11) and with a pivotable bearing point (7) for the pawl (4), wherein the pawl (4) can be actuated by means of at least one coupling rod (10) and by the drive element (11), and the coupling rod (10) interacts with the pawl (4) by means of a coupling member (8) having a transmission ratio.
