Abstract (en)

[origin: WO2020124108A1] Guide system (5) for guiding at least one movably mounted door leaf (3a) relative to a furniture carcass (2), comprising:
- a first guide rail (7a) for guiding the at least one door leaf (3a), - a second guide rail (7b) for guiding the at least one door leaf (3a), wherein, in a mounted state, the second guide rail (7b) extends transversely relative to the first guide rail (7a), - a carrier (11) which is movable at least along the second guide rail (7b) and which is or can be connected to the at least one door leaf (3a) via at least three furniture hinges (10) which can be arranged or which, in the mounted state, are arranged at a distance from one another, wherein the carrier (11) has a longitudinal direction (L1), wherein all the furniture hinges (10) via which the at least one door leaf (3a) can be connected to the carrier (11), or is connected thereto in the mounted state, is or can be arranged on a common mounting part (16) that is separate from the carrier (11), wherein the mounting part (16) can be releasably connected to the carrier (11) via at least one fastening device (18a, 18b), and wherein the mounting part (16) can be releasably connected to the carrier (11) in a direction extending transversely with respect to the longitudinal direction (L1) of the carrier (11).
