Abstract (en)  
[origin: WO2020126886A1] The invention relates to a drive device (1) having a drive assembly (2) which has an output shaft (4) and which is mechanically connected by means of a shift clutch (6) to an output shaft (7) of the drive device (1). Here, provision is made whereby at least one hydraulic channel (28) and one hydraulic cylinder (25) connected in terms of flow to the hydraulic channel (28) are formed in the output shaft (4), wherein, in the hydraulic cylinder (25), a hydraulic piston (26) which is coupled to the shift clutch (6) for the purposes of actuating the latter is arranged movably.
