Abstract (en)

[origin: WO2020127829A1] The invention describes a data memory, a computer unit and a method for executing a function of a vehicle, wherein, when executing the function, values of an item of information relating to prespecified local areas of a digital map are taken into account, wherein the values of the item of information are stored in the form of an expected value and a distribution of the values around the expected value.
