Abstract (en)
[origin: WO2020128018A1] A MEMS system comprises a first permanent-magnetic microstructure (10) and a second permanent-magnetic microstructure (15). The first permanent-magnetic microstructure (10) is movable in a first direction (10v). The second permanent-magnetic microstructure (15) is arranged at a distance from the first permanent-magnetic microstructure (10), the second permanent-magnetic structure (15) or one or more elements of the second permanent-magnetic microstructure (15) being moved in a second direction (15v) or actuated or experiencing a rotation as a result of a movement of the first permanent-magnetic microstructure (10) in the first direction (10v).
