Abstract (en)
[origin: WO2020128341A1] The present description relates to an optoelectronic device (100) comprising an integrated circuit comprising light-emitting diodes (104), thin-film transistors (110) and a stack (126) of electrically insulating layers, said stack (126) being situated between the light-emitting diodes (104) and the transistors (110, 504), said stack (126) furthermore comprising conductive elements (128, 132) between and through said insulating layers, said conductive elements (128, 132) connecting at least some of the transistors to the light-emitting diodes (104).
